Director of Building and Community Response

Date: April 28, 2003

Subject: Disinfection of Potable Water Systems

Section 610 of the Florida Building Code "Plumbing" requires disinfection of all new or repaired potable water systems. Potable water systems are to be purged of all deleterious matter and disinfected prior to final C/O. All plumbing contractors will be expected to comply with this section of the code.

Upon completion of purging and disinfecting the potable water system a "Certificate of Compliance" will be issued to the Building Department from the plumbing contractor stating: "The potable water system at (address) has been purged and disinfected in accordance with Section 610 of the 2001 Florida Building Code "Plumbing".

Attached are copies of the City of Fort Pierce Certificate of Compliance and Section 610 (FBC) "Plumbing".
