

A/C Change Out Form

Job Address: _____

Permit # _____

Existing Equipment

Condenser Make/Model #: _____

SEER: _____

Minimum Circuit Amps: _____

Max. Overcurrent Protection: _____

A.H.U. Make/Model #: _____

Heat Strip K.W.: _____

Minimum Circuit Amps: _____

Max. Overcurrent Protection: _____

Package Unit Make/Model #: _____

EER: _____

Minimum Circuit Amps: _____

Max. Overcurrent Protection: _____

New Equipment (To be Installed)

Condenser Make/Model #: _____

SEER: _____

Minimum Circuit Amps: _____

Max. Overcurrent Protection: _____

A.H.U. Make/Model #: _____

Heat Strip K.W.: _____

Minimum Circuit Amps: _____

Max. Overcurrent Protection: _____

Package Unit Make/Model #: _____

EER: _____

Minimum Circuit Amps: _____

Max. Overcurrent Protection: _____

(1) Wire Size for Condenser: _____ Type: _____ (TW, THHN, THW)

(2) Wire Size for A.H.U: _____ Type: _____ (TW, THHN, THW)

(3) Size of Disconnect Circuit Breaker or Fuse: _____

(4) For **condenser or A.H.U. replacements only** (partial system):

Verify system components by:

- 1) Data from AHRI for verification of energy rating
- 2) Obtain an energy rating from an accredited testing lab (example ARL labs)
- 3) Manufactures letter stating compatibility of two pieces of equipment for code purposes
- 4) Florida-registered Professional Engineer's verification letter

*****For commercial units 5 tons or larger, please check ONE of the following:*****

Supply volume exceeds 2000 CFM.

Manufacturers supply tables submitted showing no wiring configuration capabilities to exceed 2000 CFM.
