

Window/Door Buck Inspection Affidavit

Note: This form only applies to existing buildings

Permit #: _____

Address: _____

Because a window/door buck inspection creates an additional inspection and inconvenience for owners and contractors, this form may be used in lieu of the buck inspection for existing buildings. This affidavit must be submitted by the contractor only. It is the responsibility of the contractor to make sure that compliant buck and buck fasteners and any required flashing are used. This form must be signed, notarized and submitted to this office prior to scheduling the final inspection.

Check the following that apply:

- Existing bucks extend beyond the face of the window and door frame and are anchored per traditional construction methods. All installations comply with FBC and product approvals.
- New bucks extend beyond the face of the window and door frame and are anchored per traditional construction methods. All installations comply with FBC and product approvals.
- Wood frame without bucks or exact rough opening masonry/concrete/steel without bucks comply with FBC and product approvals.
- Bucks are not required per FBC and product approvals.

NOTES:

- Keep all fasteners exposed (do not install anchor hole snap covers) until the window attachments have been inspected and approved, after final inspection.
- Mullion attachment must be inspected or detailed photographs are required and must be onsite for inspection.
- All undersized, damaged and/or rotten wood or bucks must be replaced.

PHOTOGRAPHS:

- All photographs must clearly identify the structure where the windows/doors are installed and have numbered opening(s) matching the floor plan or window schedule.
- See the Window and Door Hidden Fastener/Connection Inspections policy dated 1/10/2022 for fasteners that must be covered. All other fasteners must remain exposed and fastener covers left off until after approved Final Inspection.
